

PROFIL

- **Over 3 years' experience as a full-stack engineer, with in-depth expertise in backend development and API design/integration.**
- **Mastery of modern frameworks: NestJS and Spring Boot, to develop robust and scalable backend architectures.**
- **Database design: MySQL and POSTGRES, MONGODB**
- **Solid expertise in frontend development with React.js, Next.js and Tailwind CSS,**

WORK EXPERIENCE

Lead Project back end developer

Codingart, Agadir Morocco September 2023 to present

- Development of robust, high-performance APIs for web applications using Nest.js, Java, and Spring Boot, while guaranteeing their scalability and reliability.
- Design and documentation of technical diagrams (UML, use cases, etc.) to structure complex solutions and improve collaboration between teams.
- Implementation of microservices-based architectures with Nest.js, enabling fluid communication and improved scalability of services.
- Writing and maintaining unit tests, ensuring high code quality and minimizing functional regressions.
- Supervision and optimization of Git CI/CD pipelines, ensuring rapid, automated and reliable deployment processes.
- Use Trello to organize and optimize daily work.

Consultant Software Engineer

Muutaa, Quebec, Canada june2022- august2023

- Design and development of high-performance full-stack applications using Node.js, Express, Nest.js and Next.js, guaranteeing robustness and scalability.
- Creation of optimized database architectures with PostgreSQL for enhanced performance and efficient data management.
- Supervision of code versioning and facilitation of team collaboration through rigorous Git practices and collaborative workflows.
- Integration of RESTful and GraphQL APIs to deliver smooth, feature-rich user experiences.
- Proactive bug detection and resolution, with continuous optimization of existing functionality to improve user satisfaction and application performance.

Final year internship (PFE)

Muutaa, Quebec, Canada march 2022- July 2022

- Development of a full-stack mobile application for managing hospital revenue and expenditure forecasts, using Node.js, Express, PostgreSQL, and React Native, guaranteeing a reliable, high-performance solution.
- Optimization of complex full-stack applications (Demand App and Value App) with React.js, Node.js, Express, PostgreSQL and GraphQL, to improve performance and deliver a smooth, efficient user experience.
- Design of interactive and attractive mock-ups on Figma, guaranteeing an intuitive user interface and a visually engaging experience for the applications.

TRAINING

Master's degree in Computer Engineering: Software Engineering specialization

2017-2022

International University of Agadir, Morocco

PROFESSIONAL QUALITIES

- Ability to work in a team and under pressure
- Dynamic
- Autonomy
- Sense of responsibility
